

# COMPLEX SITE INVESTIGATIONS.

## OUR COMPLEX SITE INVESTIGATIONS SOLUTIONS.

Site investigations form a key part in understanding the ground conditions which may influence movement to a property and assist with the subsequent design of a solution.

Designing the type and scope of a site investigation is crucial to provide the information required, as is the resource and machinery used on site. Optera in-house engineers design the site investigation specifically to suit each individual project.

## HOW CAN IT HELP YOU.

Our in-house engineering team can either develop the investigation scheme with our clients or provide a bespoke proposal. The investigative works can also be adapted on-site in real-time should any issues or obstructions arise.

Where site investigations are carried out by Optera, our engineers can also offer a solution from the findings, assisting with cost management and avoiding delays.

## THE BENEFITS.

- Optera engineers have a wealth of experience in both designing investigative works and providing a solution that is bespoke to each property.
- We provide coverage across the UK with our in-house engineering team for both design and on-site works.
- Optera can provide complex and specialist investigations for most domestic and commercial situations.
- We can cater for difficult and restricted access sites.

## OUR EXPERIENCE.

AN EXPERT SITE INVESTIGATION IS PARAMOUNT TO DETERMINE THE PRECISE CAUSE OF A PROBLEM, AND CONSIDER THE MOST EFFICIENT SOLUTIONS. OPTERA HAVE THE EXPERIENCE AND EXPERTISE TO PROVIDE BESPOKE INVESTIGATIONS, REDUCING OVERALL COSTS AND TIMEFRAMES.
